Having a seat at the table: Disability & Disasters

Leyla Craig, Disability Inclusion and Engagement Officer Fire and Rescue NSW

22–25 AUGUST 2023 Brisbane Convention and Exhibition Centre

Fact:

People with disabilities are overrepresented in fire statistics, accounting for <u>46.7%</u> of fire fatalities from 2003-2017

Coates, L., Kaandorp, G., Harris, J., van Leeuwen, J., Avci, A., Evans, J., George, S., Gissing, A., van den Honert, R. and Haynes, K., 2019, Preventable residential fire fatalities: July 2003 to June 2017, Bushfire and Natural Hazards CRC. Credit: Metropolitan Fire Brigade

Problem:

Are people with disabilities at high risk because of their disability itself?

One-way distribution of fire-related material is inaccessible for people with disabilities.

Firefighters may not know how to approach or interact with people with disabilities.

Disconnects between people with disabilities and firefighters.

Shared Responsibilities

Sendai Framework for Disaster Risk Reduction 2015-2030, Preamble 7 (p. 10) calls for a people-centred prevention approach to disaster risk:

7. There has to be a broader and **a more people-centred preventive approach** to disaster risk. Disaster risk reduction practices need to be multi-hazard and multisectoral, inclusive and accessible in order to be efficient and effective. While recognizing their leading, regulatory and coordination role, Governments should engage with relevant stakeholders, including women, children and youth, **persons with disabilities**, poor people, migrants, indigenous peoples, volunteers, the community of practitioners and older persons in the design and implementation of policies, plans and standards. There is a need for the public and private sectors and civil society organizations, as well as academia and scientific and research institutions, to work more closely together and to create opportunities for collaboration, and for businesses to integrate disaster risk into their management practices

Australian Disaster

adrc 23

What if we can reimagine drawing on the lived experiences of people with disabilities to change how emergency services approach disability and resilience in emergencies?

adrc 23 Australian Disaster Resilience Conference

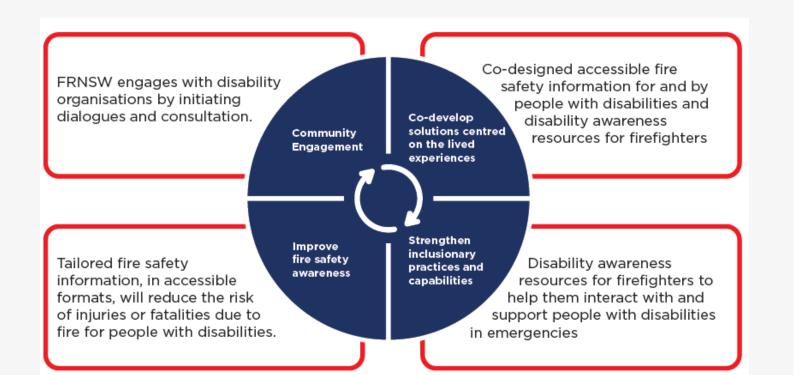

Solution: Introductory Disability Awareness Training

- Led for and by people with disabilities as experts with lived experiences
- Used as part of the FRNSW Station Leadership and Development Program
- Misconceptions, perceptions of firefighters and how to best support them in emergencies

Future Plans

Fire Proofing Vulnerable Communities project:

- Centres people with lived experience of disability to lead, voice, and participate in all fire safety conversations
- Increase their resilience to future fire risks and fatalities

Watch a snippet of the Disability Awareness training
